

Students are required to provide copies of the results of a negative 2-step TB test and a copy of an acceptable background screening from the Family Care Safety Registry when they register for the CNA Class. Copies need to be made before coming into the office and cannot be made by the office staff. Please see below for information on these requirements:

## **2-Step TB Test**

St. Charles Community College requires students to provide proof they are free from TB by completing a 2-step TB Test\*. This test can be done at any qualified facility – doctor’s office, urgent care center, clinic, county health department, etc.

**First step:** TB test is administered and the individual returns to the facility after 48-72 hours to have it read and receive results of the test in writing.

**Second step:** Person returns to qualified facility anywhere from 1-3 weeks after first TB test to have the entire procedure completed a second time.

SCC requires copies of **BOTH** test results in order to fulfill the TB test requirements.

\*Students who test positive for TB or who have a reaction to the TB test may have a chest x-ray done and submit a copy of the doctor’s findings indicating that they are free from any active TB.

Please remember to submit COPIES of your test results and keep the originals for your records.

## **Family Care Safety Registry**

Students must register with the Missouri Family Care Safety Registry (FCSR) and provide a copy of an acceptable background screening dated within 90 days of the start of class. On-line registration is available at <http://www.health.mo.gov/safety/fcsr>. The results of the FCSR screening will be mailed to you.

***Please note: The name the FCSR screening MUST match the name on your CNA registration form.***

For additional information regarding the Registry or your status on the Registry please call their toll-free number: (866) 422-6872 (8:00 am - 3:00 pm CST Monday-Friday).
